

# Background Music Customization

All recordings come already with their own music, free of any additional charge for the music. If you would prefer different background music than the one used on the recording, you can [order Customized Background Music](#).

Customized background music is available for the following types of recordings: empowering affirmations, subliminal, supraliminal, and supraliminal plus recordings. It is NOT available for hypnosis, mantras, or brainwave entrainment recordings.

Here are the steps for ordering Customized Background Music:

**Step 1** - Purchase the recording of your choice. If you have already purchased it once, you don't need to purchase it again.

**Step 2** - Click on "add to cart" button on the page with music background samples. The charge is per recording you want customized. If you want to customize background music on 3 recordings, then order customization for 3 recordings.

**Step 3** - Email me the titles of the original recordings you have purchased, as well as the titles of the background music you would like to have on those recordings.

If you are ordering downloads, you will receive download link for your customized recording within 72 hours. Otherwise your recordings will be shipped, after you have added the appropriate shipping charge.
